AI-driven smart desk, Charcoal.inc

All India Rank 56, CEED 2017
Common Entrance Examination for Design

Ojasv Apurv

Lead UX Designer | Design Manager

I lead UX for complex enterprise and internal tools, most recently for Philips, SAP, TP Vision and Bosch. I started as an electronics engineer and trained formally as a product designer at IISc, so I blend technical logic with user-centred design. My mantra for good experience: keep the tables organised and approach the problem systematically.

8+ years
in Product and UX design

6 Enterprise clients
as Senior UX consultant

Red Dot 2021
for an AI-driven smart desk

Experience

Lead UX Designer | Design Manager — PeepalDesign, Bangalore — Oct 2021 – Present

- Lead UX for complex internal tools as an embedded consultant with six enterprise clients across healthcare, enterprise cloud, digital signage, engineering data and HR tech.
- Managed 5+ designers across client projects.
- Mentored designers from other disciplines into UX roles, and coached aspirants into M.Des programmes through the CEED and NID entrance exams.
- Built the uxmasterclass.com event website in 2025; PeepalDesign co-sponsored the event.

CLIENT ENGAGEMENTS AS SR. UX DESIGN CONSULTANT

Philips Healthcare, Serviceability — Mar 2026 – Present

- Refining and redesigning workflows across multiple internal tools under Philips Remote Services and Philips Support Connect.
- Leading the redesign of administration tool that a core group of admins use to manage users, companies and contracts.

SAP Labs Enterprise cloud — Sep 2025 – Feb 2026

- Worked with multiple client teams in Public Cloud to refine the workflows of their internal applications.

TP Vision Digital Signage Management — Oct 2024 – Sep 2025

- Revamped the centralised display management system to improve operations and functionality of signage displays.
- Optimised workflows and design across multiple series of signage displays.

Bosch Global Software Technologies Image data curation for ADAS training — Jul 2022 – Aug 2024

- Led a cross-team workshop to rework the image data pipeline workflow, narrowing the scope of several applications and cutting repetitive tasks.
- Redesigned an internal application for image data optimisation.
- Designed data visualisation for test-run data to make search and filtering faster.

HealthAsyst Healthcare Management — Feb 2022 – Jul 2022

- Revamped the clinic management application and report processing; designed its data visualisation and dashboards.
- Built a design system from scratch to support the ground-up redesign of the application.

TopSource Worldwide Portico Application, as UX Design Consultant — Oct 2021 – Feb 2022

- Revamped the HRMS experience; designed its data visualisation and dashboards.
- Redesigned the Portico app across mobile and web.

Sr. Product Designer — Charcoal.inc — Sep 2019 – Oct 2021

- Created the first AI-driven smart desk, which went on to win the Red Dot Award 2021.
- Led design decisions for three products, covering the end-to-end user experience around the desk.
- Designed the web and mobile applications that work with the desk.

Product Design R&D Intern — SID, IISc in partnership with Volga Instruments — Jan 2018 – Jan 2019

- Worked with Volga Instruments Pvt. Ltd., an R&D knowledge-sharing partner of the Society for Innovation & Development (SID), IISc, to design and develop a 6-DOF robotic system for warehouse management.
- Designed the ROS dashboard for robot movement and training.
- The robotic arm was deployed and tested at Hindustan Unilever Ltd, Mumbai.
